I would like to comment on Project 3018093 at 9666 51st Ave S. It is full of exceptional trees and next to Kubota Gardens a gem, not only in the state but nationally. Please do not do upset its ecosystem! The exceptional trees must be preserved! I remember being enchanted by the gardens when the Kubotas were still living there and was so happy to finally be allowed to enter it. One of my favorite places in the world..

Thank you so much
